Re: Giant Communications

My wife and I have lived in Denison for 64 years, and have enjoyed experiencing many improvements to the welfare and lifestyle of our city. The past two years have brought home the importance of having fast, quality internet service for students and residents working from home as well as having reliable social communications.

I believe that by making fiber optic, cable-based internet service available to the citizens of Denison, Giant Communications would provide an invaluable service to our city. This would be a great improvement for both existing residents and businesses, but also a great incentive for families and/or businesses who may consider moving here.

As a resident, and as mayor of Denison, I fully support Giant Communications in their efforts to obtain a grant to help fund this project.

Sincerely,
