## Original Submission

03/22/2022

Please provide your name:

**Eric Vogel**

Please provide your address:

**800 W Miller Rd  
lola  
KS  
66749  
US**

Please provide a phone number:

**620-380-0066**

Please provide your email address

**evogel@kwikom.com**

I am providing response comments related to the following application (choose one):

**KwiKom Communications - Osage City**

I am responding to concerns this project:

**Proposes to serve an area that already has service**

Please provide your response to the public comments received in the text box below.

**While FTTn technology across legacy copper networks does have the technical capability of achieving broadband speeds, these speeds rarely reach the end user, especially during peak usage times. These types of networks are difficult to scale, as so many factors can affect delivery on older copper infrastructure, which often results in a frustrating experience for the end user. This is evidenced on many fronts including the NTIA Broadband Availability Map as well as several speed test submissions from end users. KwiKom's plan will deliver true gigabit capable FTTx for every address in city limits that subscribes, and will finally deliver true broadband internet speeds city-wide at a gimmick-free, stable price that consumers can afford.**

Please provide supporting documents relative to your comments. Please submit multiple files as a ZIP file.
